Welcome to the world of
GAME OF WOLVES

Sign up guide

Team 12 (Perseus)

1 OPEN THE WEB APP

Scan the QR code to go to the page (preferably Chrome on mobile or laptop), and fill in your name and e-mail address. Quickly read through the terms and services and take a nice selfie of yourself. This will be used as your profile image.

GET YOUR ACTIVATION CODE 2

7 8 1 4 _ _

Check your email address, you have received an activation code from us. Use this to activate your account. You are now one step closer to playing the game.

3 CHOOSE YOUR FACTION

One last step before you can play the game: choosing your faction. Each faction has its own benefits, so choose wisely depending on your preferred playing style. Other people from the same faction might choose to side with you (or even betray you).

Adventurer

START PLAYING 4

You are now ready to explore the world of wolves. Explore the app, and look for small visual hints that guide you through your first play-through. For things to do, check the next page to check out the features.

Features list

1 TRACK OPPONENTS

In the map, you can get a list of opponents that are currently active by tapping on your own player icon. Choose one that you wish to center and track, to easily hunt them down. Tap on an empty space on the map to freely explore the area and access other features of the app.

2 BATTLE ENEMIES

Tap on an enemy to give them a handshake. When you receive a handshake, raise your hand as a social protocol to notify the other player that it's really you. You can now battle each other in game. Your chance of a successful attack depends on your stamina, fatigue, etc. Make the gamble, but remember that a miss can result in you taking damage, so consider fleeing when needed.

3 SMILE FOR THE CAMERA

You can take pictures of other players to identify and battle them. A facial recogniser compares the photo to the stored players, and retrieves the correct one for you to battle.

4 SPREAD THE JOY!

Want other players to join the fun? Go to the settings menu in your profile and tap 'share QR code'. Other players can use this to link to the game. You can also see the used licences and other useful information in the settings menu.

5 LET US KNOW WHAT YOU THINK

Any comments for us, seen any bugs we need to solve, or just want to share some kind words with us? Let us know by going to settings and clicking 'give feedback'.
